Verosol offre una gamma di prodotti filtranti in tessuto costituito da uno strato di alluminio sottilissimo, che conferisce caratteristiche eccellenti di regolazione della luce e ombreggiamento. Riflessione del calore e regolazione luminosa sono decisivi per la creazione del clima negli interni e adatti al lavoro a computer, determinanti per il comfort termico e visivo, nel rispetto della normativa europea VDU (EU 90/270).

I tessuti Verosol sono disponibili in differenti gradi di trasparenza: trasparente, semitrasparente, opaco.

*Verosol offer a wide range of solar control fabrics coated with a thin layer of aluminium ensuring excellent light and solar transmission characteristics.*

*Control of these characteristics, i.e. heat and light, contribute to the comfort of the internal environment and are particularly suited to computer work areas. The fabrics guarantee thermal as well as visual comfort in compliance with European regulations concerning lighting conditions at VDU work stations (EU directive 90/270).*

*Verosol fabrics are available with various degrees of transparency: transparent, semi-transparent, opaque.*
